SYSTEM AND METHOD FOR PROVIDING WIRELESS DEVICE ACCESS

**Abstract** 

A system and method for enabling users to send and receive messages and other

information from mobile devices and enabling users to access server-based information using

mobile devices over wireless data networks are disclosed. The present invention provides a

system and method for providing wireless device access where users may have access to

electronic mail, calendar, public directories and other information from the user's mobile device,

such as a cell phone, interactive pager, PDA or other wireless device, via a wireless service

provider.
